# FOREWORD

Greetings from the house of personal service and the home of the world's finest iris rhizomes! This, too, is the home of the Linse (say Linsey) introductions, Bold Contrast, Cascadian, For Sure, Spellbound and all of the rest.

I have neglected saying anything in the past few catalogs about the wonderful size and quality of Easy Breeze rhizomes—a sad mistake, for believe me, no one, anywhere, can raise, or will send you better ones. Carefully grown in the rich silt soil of our gardens, skillfully watered and tended, then ripened off at the proper time, they come to you large and firm, well supplied with increase buds and plentiful strong, healthy roots—all ready to start growth when planted in your garden, and to increase and bloom for you the following season. Try them, you'll see what I mean!

Now, our old customers know all of this, so it's really directed to those who have not ordered from us before. To get Easy Breeze quality, order only from Easy Breeze Gardens. We have neither agents nor connection with any other garden, either in Yakima, or elsewhere. Our only office is located at our home, 1421 North 16th Avenue in Yakima, Washington. Every order shipped will be personally selected by the writer, (that's what I mean by personal service) and I will personally guarantee your entire satisfaction without question, as to size, quality, ability to grow, increase and bloom, and be true to name. Free replacement if otherwise. Kindly notify me of failure to grow before October 1st, year of planting—the end of our shipping season. Certainly a firm can be no better than the people at it's head—you will never be disappointed with your treatment at Easy Breeze.

Iris fans, hybridizers, shutterbugs—everyone, come and see us at blooming time. Our commercial planting has been moved to our Lookout Boulevard property, so, for the edification of our guests and our convenience in hybridizing, I have arranged a display of everything we grow here at the home place. These fine new things have been planted in alphabetical order in single rows with five-foot paths between, for easy viewing. Too, there are 2,000 new seedlings, several hundred selected seedlings, including some fine hybrids, and a few guests. It should be interesting, for sure!

Thanks, old friends, for past orders. When you can, drop by!

Sincerely  
JACK LINSE

# CHOOSE YOUR OWN EXTRAS

## GIGANTIC COLLECTION OFFER

The entire catalog to choose from!

On all orders of \$10.00 or more you may choose, absolutely without cost, an additional 50% in iris value. For \$10.00 choose an added \$5.00 worth, for \$50.00 an added \$25.00 worth, and so on. Smaller orders will receive extras of our choosing. Because of the huge size of our rhizomes and the high postal rates we invite you to choose some of the newer, more expensive things for your extras. It will save us postage and you will receive something of which you can be proud. Also, will you kindly favor us by naming one or two alternates? It will help us a lot. Every rhizome we ship will be our absolute topmost quality, the world's finest! In addition, the prices on our new things are not inflated to take care of these presents and bonuses—truly, this is real value! Admittedly, sending out extras with an iris order is almost a universal practice (but not quite, I wonder why?), but allowing the customer to select from anything in the catalog is almost unheard of. In this way, if you have an extensive collection, you can avoid duplication. But that's not all—read on!

**SPECIAL BONUS OFFER—A Free Gift to You!** In order to acquaint you with our quality stock and guaranteed personal service, I make the following offer: On all orders of \$15.00 to \$24.99 I will make you a present of a top quality rhizome of either Party Dress or Pinafore Lass—specify which. On orders of \$25.00 to \$39.99 either Solid Gold or Happy Birthday. On orders of \$40.00 to \$59.99 the fabulous new Storm Warning. Lastly, the jackpot—on orders of \$60.00 or more, a rhizome of the fabulous new Phoebus Apollo. If ever an iris was worth \$25.00 this is the one, and we are fortunate to have the only fair stock of it in the United States. Every gift iris offered here is a standout new variety—our best—and in heavy demand. Might I tip you off to order early to be sure of the one of your choice? This offer is in addition to the regular 50% bonus, is open to both old and new customers and is good while our stocks last.

Order early! We guarantee safe delivery to any State in the U. S. A.

## 1955 INTRODUCTION

**FAIRY DANCE** (Linse 1955) 36". A dancing, delectable darling! This lovely pale campanula violet with blue tipped yellow beard has instant appeal. Done in the most modern manner, with well held standards and broad, horizontally flaring falls with a ruffle and lilt that will win your heart. Perhaps it may have a wee bit of that intangible something inherited from its part Onco parentage, but seemingly, it is tall bearded. Its form, substance, foliage and manner of growth are beyond reproach. Branching is fair and the large blossoms have a seven inch spread. From Ripples x The Capitol. Name transferred from an older seedling. Each \$20.00

## CULTURAL DIRECTIONS

Irises will grow almost anywhere, but respond to good care and soil just as any other plant. When you plant, try to give them an uncrowded position with good sunlight. A slightly elevated position where no water stands is best. To avoid having to move and divide too often they are best planted about two feet apart. Closer planting will achieve better immediate effect but they will soon become crowded and have to be moved. If you have **well cured** compost, by all means use it, there is nothing finer. Mix it with the soil when planting, or use as a mulch. Steamed bone meal is also very good. Stay away from fertilizers heavy in nitrogen and keep all fertilizers excepting those mentioned away from the rhizomes. Make a good hole, spread the roots well and cover the rhizomes with perhaps an inch of soil. Firm well water and use good garden practice from then on. It is advisable to protect newly planted irises over winter in cold climates. Mulch with anything that will not pack down, such as salt hay, excelsior, fir boughs, etc. One of the easiest ways is to draw up a couple of inches of extra soil around them with the advent of cold weather, like hilling up corn or potatoes. This extra soil can be scratched away when growth starts in the spring. I have found this method very satisfactory on semi-tender things.
